

## « System Engineer » - full-time

### Your future Job

For any of our offices (Belgium headquarters, French, United Kingdom or Dutch entity), we are looking for a dedicated and experienced future colleague to join our Product department.

Our solutions and products are always improving and as System Engineer you contribute to the security of our Network and solutions and to the development of our products in the Cloud. Reporting to the Head of Products, you will be part of a team of Developers and ICT Products owners and you will mainly have interactions with your direct colleagues and our Head of Research & Development.

Netaxis offers a range of Telecom solutions, products, and services. The company is committed to fulfil the highest expectations of their customers. The projects are operational in nature, involving new technologies and application developments.

### What will be your roles?

- You will work on the security part of the gateways by putting in place security bundles for our customers.
- You will develop and manage DB and Cloud databases for our products & solutions.
- You will organise and follow-up the selling of our solutions in the Cloud thanks to your global vision on Virtualisation Frameworks (VMware, KVM and Proxmox).
- You are the key person to evaluate which kind of hardware should be built up on our solutions (as we are moving our products to the cloud).
- You will coordinate the Public Cloud (OCI, AWS, AZURE) and move amongst different scenarios and providers as soon as our SaaS performances are ready for customers. Then you will manage all VMS.
- You are responsible for operating systems (currently : Linux/Windows) and for our applications and you will adapt our products and solutions to news Microservices (Docker,Kubernetes) modeling.
- You will work proactively on the checking of our IT Administration tools : GSuite, MS Admin, office 365, VPN management, DNS Management, website management (Wordpress), Firewalling etc.

### Working with us

Netaxis was founded in 2010 in Brussels, Belgium, by a team of experienced Telecom engineers. The company quickly established itself amongst the Telecom community in Belgium and were soon winning integration contracts with major players in the market. Having designed and developed networks the company was then asked to support and monitor these networks and a second line of business was soon established.

Building a reputation for high quality solutions and services the company has grown steadily and now has over almost 50 members of staff, mostly engineers. Netaxis counts the majority of Tier 1 and Tier 2 Telecom companies in Benelux as customers and for many of them is

looked upon as the trusted adviser for future product and network engineering strategy. The inhouse team of developers has successfully introduced new products now used by a large number of our customers. In 2017 Netaxis embarked on a program of international growth and has opened offices in The Netherlands, Italy, France and the United Kingdom. The customer base is becoming truly international and the company has ongoing projects in Africa, Asia and the USA. The company is continuously growing and can now be considered as a real scale-up!

Netaxis is not only innovative in its products and services but also in its organisation. You will work in a self-managed environment where collaboration is highly valued and your input truly considered. Netaxis is organized in such a way that it allows autonomy and distributes power throughout the organization.

## Who are you?

- You master OS Admin (Linux, shell scripting, security management etc.).
- You have a strong experience in debugging and troubleshooting systems.
- You have a very good global vision on Virtualisation Frameworks (VMware, KVM and Proxmox).
- You have a strong interest in Public Cloud (OCI, AWS, AZURE). You can define & select the best Cloud partner based on our solutions requirements.
- Your knowledge on Microservices (Docker, Kubernetes) will be a plus.
- You have DB Admin (Postgres, MongoDB) skills and knowledge : DB stand alone + Cloud database.
- You master IT Admin tools and you work in a proactive way (GSuite, MS Admin, office 365, VPN management, DNS Management, website management (Wordpress), Firewalling) etc.
- Your knowledge about VoIP deployments is more than welcome.
- You are either based in Belgium or eager to travel on a 25% base to visit and organise our labs.
- You hold a perfect command of the English language (mandatory), and you have a very good level of French &/or Dutch. Any other language is an added value.
- You preferably hold a University degree.
- You feel comfortable to handle very good communication and interpersonal relation skills in an international environment.
- You interact with our customers, focusing on their satisfaction.
- You systematically analyze problematic situations and are good at prioritize urgencies
- You show proactivity and responsibility.
- You are a good team player.
- You act autonomously.
- You are dynamic, flexible and creative in your area of field.

## What NetAxis Solutions offers you

- A great chance to join any of our offices, for a full-time position!

- The opportunity to work in a team who practice mutual respect and support.
- A growing innovative company where you will have the freedom to develop your talents in a self-managed structure.
- A place where quality and your creativity really count.
- Real possibilities to upgrade your competencies thanks to training & mentoring.
- Real career possibilities.
- The opportunity to work in a team who practice mutual respect and support.
- An attractive package that will depend on the country you will be located in.
